

EDUCATION	ETH Zürich Zürich, Switzerland <i>M.Sc. in Medical Imaging</i> 2023 – 2025 (expected) • Relevant courses: Introduction to Machine Learning, Deep Learning, Image Analysis & Computer Vision, Mobile Health & Activity Monitoring, Medical Image Analysis • GPA: 5.25/6.00
	Universidad Carlos III de Madrid Madrid, Spain <i>B.Sc. in Biomedical Engineering</i> 2019 – 2023 • Relevant courses: Numerical Methods, Systems & Signals, Solid Mechanics, Control Engineering (Honors), Instrumentation and multimodality imaging (Honors) • GPA 8.77/10.00
PUBLICATIONS	• Evaluation and assessment of clique arrangements for the estimation of omnipolar electrograms in high density electrode arrays. <i>Phys Eng Sci Med</i>, 2023. doi:10.1007/s13246-023-01287-8. • Assessment of the Interelectrode Distance Effect over the Omnipole with High Multielectrode Arrays. IEEE EMBS 2023. • Estudio Comparativo con Señales Epicárdicas de las Limitaciones del Omnipolo con Electrodo de Alta Densidad. Annual Congress of the Biomedical Engineering Society 2022.
EXPERIENCE	Harvard Medical School Boston, MA 2025.04 - 2025.10 • MSc thesis project on the 3D reconstruction of post mortem brains from photographs of dissection • Expected manuscript at eLife Science Advances • Skills: Python, Pytorch, cluster computing, 3D rendering, Diffusion Models, UNet architectures, Neural Implicit Fields.
	CVL ETH Zürich 2024.09 - 2025.03 • Pushing the state of the art in MRI reconstruction, exploring deep learning strategies to recover under-sampled k-space data from accelerated MRI acquisitions • Skills: Python, Pytorch, NERFs, cluster computing, MRI reconstruction.
	PSI Villigen, Switzerland 2024.03 - 2024.06 • Investigation and design of non-invasive techniques for eye tracking, with application in proton therapy of ocular tumors • Skills: Python, 3D geometric models, algorithm optimization.
	BioITACA UPV, Valencia, Spain 2022.06 - 2023.09 • Development of novel biomarkers for the electrophysiological characterization and detection of arrhythmogenic tissue • Journal Publication; Physical and Engineering Sciences in Medicine. • Poster at IEEE EMBS Sydney 2023, and presentation at Annual Congress of the Biomedical Engineering Society, 2022. • Skills: MATLAB, RStudio, signal processing.
	BAM Lab University of Maryland, College Park, MD 2022.02 - 2022.05 • Design, 3D printing and testing of a soft-robotic prototype of a marine turtle • Skills: Soft robots, SolidWorks, fluid mechanics, CAD modelling, prototyping, 3D printing

AWARDS AND HONORS	• La Caixa Fellowship 2023.06 International post-graduate scholarship awarded yearly to 100 graduate students (Spain & Portugal)
	• Fundacion Botin Scholarship Undergraduate grant 2019.09 2022.09
SKILLS	Languages: Spanish, English, French, German. Programming: Python, RStudio, MATLAB.
